

absl::synchronization
_internal::PerThreadSemTest::Tick

```
graph LR; A["absl::synchronization  
_internal::PerThreadSemTest::Tick"] --> B["absl::synchronization  
_internal::PerThreadSem::Tick"]; B --> C["AbsInternalPerThreadSemPoke"]
```

The diagram illustrates a sequence of three function calls. The first call, 'absl::synchronization_internal::PerThreadSemTest::Tick', is highlighted with a gray background. A blue arrow points from this box to the second box, 'absl::synchronization_internal::PerThreadSem::Tick'. Another blue arrow points from the second box to the third box, 'AbsInternalPerThreadSemPoke'.
