

absl::container_internal
::raw_hash_set::clear

absl::container_internal
::raw_hash_set::erase

absl::container_internal
::CommonFieldsGenerationInfoDisabled
::set_reserved_growth

```
graph LR; A["absl::container_internal::raw_hash_set::clear"] --> C["absl::container_internal::CommonFieldsGenerationInfoDisabled::set_reserved_growth"]; B["absl::container_internal::raw_hash_set::erase"] --> C;
```

The diagram illustrates a relationship between three functions. On the left, two white rectangular boxes with black borders contain the function signatures 'absl::container_internal::raw_hash_set::clear' and 'absl::container_internal::raw_hash_set::erase'. On the right, a larger gray rectangular box with a black border contains the signature 'absl::container_internal::CommonFieldsGenerationInfoDisabled::set_reserved_growth'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'clear' and 'erase' functions call or depend on 'set_reserved_growth'.
