

absl::ABSL\_NAMESPACE  
\_BEGIN::AnyOfPolicy::Find

absl::log\_internal  
::FNMatch

absl::string\_view::  
find\_first\_of

```
graph LR; A["absl::ABSL_NAMESPACE  
_BEGIN::AnyOfPolicy::Find"] --> C["absl::string_view::  
find_first_of"]; B["absl::log_internal  
::FNMatch"] --> C;
```

The diagram illustrates a mapping from two source functions to a target function. Two white boxes on the left, each with a black border, contain the source function names. Blue arrows point from each of these boxes to a single gray box on the right, which contains the target function name. The top source box is 'absl::ABSL\_NAMESPACE\_BEGIN::AnyOfPolicy::Find' and the bottom source box is 'absl::log\_internal::FNMatch'. The target box is 'absl::string\_view::find\_first\_of'.
