

std::false\_type

absl::HasOstreamOperator  
< T, typename >

```
graph BT; A["absl::HasOstreamOperator< T, typename >"] --> B["std::false_type"]
```

The diagram illustrates a relationship between two C++ types. At the bottom, a gray rectangular box contains the text 'absl::HasOstreamOperator' followed by a line break and '< T, typename >'. At the top, a white rectangular box with a black border contains the text 'std::false\_type'. Two blue arrows originate from the top edge of the gray box and point upwards to the bottom edge of the white box, indicating that 'absl::HasOstreamOperator' inherits from or specializes 'std::false\_type'.
