

Eigen::SVDBase::setThreshold

Eigen::SVDBase::setThreshold

Eigen::SVDBase::derived

```
graph LR; A[Eigen::SVDBase::setThreshold] --> C[Eigen::SVDBase::derived]; B[Eigen::SVDBase::setThreshold] --> C;
```

The diagram illustrates a relationship between two function calls and a derived object. On the left, there are two identical boxes, each containing the text 'Eigen::SVDBase::setThreshold'. On the right, there is a single box containing the text 'Eigen::SVDBase::derived'. Two blue arrows originate from the right side of each box on the left and point towards the left side of the box on the right, indicating that both function calls are directed at the derived object.
