Eigen::CholmodDecomposition
::init

```
graph LR; A[Eigen::CholmodDecomposition::CholmodDecomposition] --> C[Eigen::CholmodDecomposition::init]; B[Eigen::CholmodDecomposition::CholmodDecomposition] --> C;
```

The diagram illustrates a relationship between two instances of the `Eigen::CholmodDecomposition` class and its `init` static method. On the left, there are two identical boxes, each containing the text `Eigen::CholmodDecomposition::CholmodDecomposition`. Blue arrows point from the right side of each of these boxes to the left side of a single box on the right. This box on the right is shaded gray and contains the text `Eigen::CholmodDecomposition::init`.
