

absl::cord_internal
::CordRepBtreeReader::Next

absl::cord_internal
::CordRepBtreeReader::Read

absl::cord_internal
::CordRepBtreeNavigator::Next

```
graph LR; A["absl::cord_internal  
::CordRepBtreeReader::Next"] --> C["absl::cord_internal  
::CordRepBtreeNavigator::Next"]; B["absl::cord_internal  
::CordRepBtreeReader::Read"] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'absl::cord_internal' followed by '::CordRepBtreeReader::Next' on the next line. The bottom box contains 'absl::cord_internal' followed by '::CordRepBtreeReader::Read' on the next line. On the right, there is a single gray rectangular box with a black border containing the text 'absl::cord_internal' followed by '::CordRepBtreeNavigator::Next' on the next line. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both methods from the left are associated with or mapped to the method on the right.
