

absl::ABSL_NAMESPACE
_BEGIN::TEST

```
graph LR; A["absl::ABSL_NAMESPACE  
_BEGIN::TEST"] --> B["absl::gntohl"]; A --> C["absl::gntohl1"]
```

The diagram illustrates a namespace mapping. A source namespace, 'absl::ABSL_NAMESPACE_BEGIN::TEST', is shown in a grey box on the left. Two blue arrows point from this source namespace to two target namespaces on the right: 'absl::gntohl' and 'absl::gntohl1', each contained in a white box with a black border.

absl::gntohl

absl::gntohl1
