

`absl::operator<<`

`absl::status_internal
::StatusRep::ToString`

`absl::StatusCodeToString`

```
graph LR; A[absl::operator<<] --> C[absl::StatusCodeToString]; B[absl::status_internal::StatusRep::ToString] --> C;
```

The diagram illustrates a relationship between three code elements. On the left, two white rectangular boxes with black borders contain the code `absl::operator<<` and `absl::status_internal::StatusRep::ToString`. On the right, a gray rectangular box contains the code `absl::StatusCodeToString`. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both functions on the left are associated with or delegate to the function on the right.
