Capacity

```
graph LR; A["absl::container_internal::raw_hash_set::merge"] --> D["absl::container_internal::raw_hash_set::AssertNotDebugCapacity"]; B["absl::container_internal::raw_hash_set::operator="] --> D; C["absl::container_internal::raw_hash_set::raw_hash_set"] --> D;
```

The diagram illustrates a relationship between three source functions and a target function. On the left, three white rectangular boxes with black borders contain the following text: 'absl::container_internal::raw_hash_set::merge', 'absl::container_internal::raw_hash_set::operator=', and 'absl::container_internal::raw_hash_set::raw_hash_set'. On the right, a larger gray rectangular box with a black border contains the text 'absl::container_internal::raw_hash_set::AssertNotDebugCapacity'. Three blue arrows originate from the right side of each white box and point towards the left side of the gray box, indicating that the three source functions are related to or call the target function.
