

absl::MATCHER_P

absl::MATCHER_P2

absl::cord_internal
::CordzInfo::GetCordzStatistics

```
graph LR; A[absl::MATCHER_P] --> D[absl::cord_internal::CordzInfo::GetCordzStatistics]; B[absl::MATCHER_P2] --> D;
```

The diagram illustrates a mapping from two matcher functions to a target function. On the left, two white rectangular boxes with black borders contain the text 'absl::MATCHER_P' and 'absl::MATCHER_P2'. On the right, a larger gray rectangular box with a black border contains the text 'absl::cord_internal' followed by '::CordzInfo::GetCordzStatistics' on a new line. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both matchers are associated with or point to the target function.
