

Eigen::SVDBase::rank

Eigen::SVDBase::setThreshold

Eigen::SVDBase::threshold

```
graph LR; A[Eigen::SVDBase::rank] --> C[Eigen::SVDBase::threshold]; B[Eigen::SVDBase::setThreshold] --> C;
```

The diagram illustrates the relationship between two Eigen library functions and a threshold variable. On the left, two white rectangular boxes with black borders contain the text 'Eigen::SVDBase::rank' and 'Eigen::SVDBase::setThreshold'. On the right, a gray rectangular box with a black border contains the text 'Eigen::SVDBase::threshold'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both functions interact with or depend on the threshold variable.
