

absl::log_internal
::LogMessage

```
graph BT; A["absl::log_internal::LogMessageQuietlyDebugFatal"] --> B["absl::log_internal::LogMessage"]
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom, a gray rectangular box contains the text 'absl::log_internal::LogMessageQuietlyDebugFatal'. At the top, a white rectangular box with a black border contains the text 'absl::log_internal::LogMessage'. Two blue arrows originate from the top edge of the gray box and point upwards to the bottom edge of the white box, indicating that 'LogMessageQuietlyDebugFatal' inherits from 'LogMessage'.

absl::log_internal
::LogMessageQuietlyDebugFatal
