

```
std::make_unsigned< T >
```

A diagram illustrating a dependency. At the top, a white box with a black border contains the text `std::make_unsigned< T >`. Below it, a gray box with a black border contains the text `absl::random_internal::MakeUnsigned< T >`. Two blue arrows point upwards from the gray box to the white box, indicating that the standard library function depends on the implementation in the Abseil library.

```
absl::random_internal  
::MakeUnsigned< T >
```
