

Eigen::Translation
::Identity

Eigen::Translation
::inverse

Eigen::Translation
::operator*

Eigen::Translation
::Translation

```
graph LR; A[Eigen::Translation::Identity] --> D[Eigen::Translation::Translation]; B[Eigen::Translation::inverse] --> D; C[Eigen::Translation::operator*] --> D;
```

The diagram illustrates the relationship between three static methods of the Eigen::Translation class and the Translation constructor. Three light gray boxes on the left, each containing a method name, have blue arrows pointing to a single dark gray box on the right containing the constructor name. The methods are Eigen::Translation::Identity, Eigen::Translation::inverse, and Eigen::Translation::operator*. The constructor is Eigen::Translation::Translation.
