

`absl::c_count_if`

```
graph LR; A[absl::c_count_if] --> B["absl::container_algorithm_internal::c_begin"]; A --> C["absl::container_algorithm_internal::c_end"];
```

The diagram illustrates the internal structure of the `absl::c_count_if` function. It is represented by a grey box on the left. Two blue arrows originate from the right side of this box, pointing to two separate white boxes on the right. The top white box contains the text `absl::container_algorithm_internal::c_begin`, and the bottom white box contains the text `absl::container_algorithm_internal::c_end`. This indicates that the `c_count_if` function internally calls these two helper functions.

`absl::container_algorithm
_internal::c_begin`

`absl::container_algorithm
_internal::c_end`
