

absl::any::operator=

absl::any::operator=

absl::any::any

```
graph LR; A[absl::any::operator=] --> C[absl::any::any]; B[absl::any::operator=] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, there are two identical white rectangular boxes, each containing the text 'absl::any::operator='. On the right, there is a single gray rectangular box containing the text 'absl::any::any'. Two blue arrows originate from the right side of the top white box and the right side of the bottom white box, both pointing towards the left side of the gray box. This visualizes two separate entities or functions being associated with or mapped to a single target entity.
