

absl::synchronization
_internal::TEST

absl::synchronization
_internal::TEST

absl::synchronization
_internal::GraphCycles
::RemoveNode

```
graph LR; A[absl::synchronization_internal::TEST] --> C[absl::synchronization_internal::GraphCycles::RemoveNode]; B[absl::synchronization_internal::TEST] --> C;
```

The diagram illustrates a mapping or transformation. On the left, there are two identical white rectangular boxes, each containing the text 'absl::synchronization_internal::TEST'. Blue arrows originate from the right side of each of these boxes and point towards a single, larger gray rectangular box on the right. This gray box contains the text 'absl::synchronization_internal::GraphCycles::RemoveNode'. The arrows indicate that both instances of the left-hand text are associated with or mapped to the single instance of the right-hand text.
