

find\_max\_step

Eigen::MatrixMarketIterator  
::~~MatrixMarketIterator

closedir

```
graph LR; A[find_max_step] --> C[closedir]; B[Eigen::MatrixMarketIterator  
::~~MatrixMarketIterator] --> C;
```

The diagram illustrates two function calls to the `closedir` function. A box labeled `find_max_step` has a blue arrow pointing to the `closedir` box. A larger box labeled `Eigen::MatrixMarketIterator` and `::~MatrixMarketIterator` also has a blue arrow pointing to the same `closedir` box. The `closedir` box is shaded gray, while the others are white with black borders.
