

`absl::erase_if`

```
graph LR; A[absl::erase_if] --> B["absl::container_internal::btree_access::erase_if"]
```

The diagram illustrates the resolution of the `absl::erase_if` function. A grey box on the left contains the text `absl::erase_if`. A blue arrow points from this box to a white box on the right. The white box contains the text `absl::container_internal::btree_access::erase_if`, which represents the internal implementation of the function.

`absl::container_internal
::btree_access::erase_if`
