

absl::container_internal
::PrepareInsertAfterSoo

absl::container_internal
::PrepareInsertNonSoo

absl::container_internal
::PrepareInsertCommon

```
graph LR; A[absl::container_internal::PrepareInsertAfterSoo] --> C[absl::container_internal::PrepareInsertCommon]; B[absl::container_internal::PrepareInsertNonSoo] --> C;
```

The diagram illustrates a common function call pattern. Two source functions, `absl::container_internal::PrepareInsertAfterSoo` and `absl::container_internal::PrepareInsertNonSoo`, are shown on the left. Both have blue arrows pointing to a single target function, `absl::container_internal::PrepareInsertCommon`, which is highlighted in a gray box on the right.
