

```
Eigen::internal::evaluator  
_base< CwiseBinaryOp< BinaryOp,  
Lhs, Rhs > >
```

The diagram illustrates the relationship between two Eigen evaluator classes. At the bottom, a grey box contains the definition of `Eigen::internal::binary_evaluator`, which inherits from `Eigen::internal::evaluator`. Two blue arrows point upwards from the `_evaluator` field of the bottom box to the `_base` field of the top box, indicating that `binary_evaluator` inherits from `evaluator`.

```
Eigen::internal::binary  
_evaluator< CwiseBinaryOp  
< BinaryOp, Lhs, Rhs >, IndexBased,  
IteratorBased >
```
