

absl::log_internal
::Encode32Bit

absl::log_internal
::EncodeFloat

absl::log_internal
::Encode32Bit

```
graph LR; A["absl::log_internal::Encode32Bit"] --> C["absl::log_internal::Encode32Bit"]; B["absl::log_internal::EncodeFloat"] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, there are two separate boxes. The top box contains the text 'absl::log_internal::Encode32Bit'. The bottom box contains the text 'absl::log_internal::EncodeFloat'. On the right, there is a single, shaded box containing the text 'absl::log_internal::Encode32Bit'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the shaded box on the right, indicating that both functions on the left are associated with or mapped to the function in the shaded box.
