

OriginalStuff/eigen
/unsupported/Eigen/src
/SparseExtra/MarketIO.h

```
graph TD; A["OriginalStuff/eigen<br/>/unsupported/Eigen/src<br/>/SparseExtra/MarketIO.h"] --> B[iostream]; A --> C[vector];
```

The diagram illustrates a dependency or source relationship. A top box contains a file path: 'OriginalStuff/eigen', '/unsupported/Eigen/src', and '/SparseExtra/MarketIO.h'. Two blue arrows originate from the bottom of this box, pointing to two separate boxes below. The left box is labeled 'iostream' and the right box is labeled 'vector'.

iostream
