

Eigen::TriangularBase
::operator()

Eigen::TriangularBase
::operator()

Eigen::TriangularBase
::check_coordinates

```
graph LR; A["Eigen::TriangularBase::operator()"] --> C["Eigen::TriangularBase::check_coordinates"]; B["Eigen::TriangularBase::operator()"] --> C;
```

The diagram illustrates a mapping or resolution process. On the left, there are two identical white rectangular boxes, each containing the text 'Eigen::TriangularBase::operator()'. Blue arrows originate from the right side of each of these boxes and point towards a single gray rectangular box on the right. This gray box contains the text 'Eigen::TriangularBase::check_coordinates'. The arrows indicate that both 'operator()' calls are resolved to the 'check_coordinates' function.
