

absl::container_internal
::PrepareInsertAfterSoo

absl::container_internal
::PrepareInsertNonSoo

absl::container_internal
::raw_hash_set::rehash

absl::container_internal
::NextCapacity

```
graph LR; A["absl::container_internal::PrepareInsertAfterSoo"] --> D["absl::container_internal::NextCapacity"]; B["absl::container_internal::PrepareInsertNonSoo"] --> D; C["absl::container_internal::raw_hash_set::rehash"] --> D;
```

The diagram illustrates a dependency or call relationship. Three source functions, each in a white box with a black border, are on the left. Three blue arrows originate from the right side of these boxes and point towards a single target function in a gray box on the right. The target function is 'absl::container_internal::NextCapacity'.
