

std::true_type

The diagram illustrates a relationship between two C++ types. At the top, a white box with a black border contains the text 'std::true_type'. Below it, a gray box contains the text 'absl::internal_statusor' followed by a multi-line definition of the 'HasConversionOperatorToStatusOr' trait. Two blue arrows point upwards from the gray box to the white box, indicating that 'absl::internal_statusor' inherits from or is a specialization of 'std::true_type'.

```
absl::internal_statusor  
::HasConversionOperatorToStatus  
Or< T, U, decltype(test< T,  
                    U >(0))>
```
