

```
std::is_base_of< C,  
  T< C::key_type, C::  
  hasher, C::key_equal,  
  C::allocator_type > >
```

```
absl::strings_internal  
::IsBaseOfSpecializationImpl  
< C, T, absl::void_t< typename  
  C::key_type, typename C::hasher,  
  typename C::key_equal, typename  
  C::allocator_type > >
```

A diagram consisting of two rectangular boxes. The box on the left is white with a black border and contains C++ code for `std::is_base_of`. The box on the right is gray with a black border and contains C++ code for `absl::strings_internal::IsBaseOfSpecializationImpl`. Two blue arrows point from the right box to the left box, one pointing to the `C::key_type` parameter and the other pointing to the `C::key_equal` parameter.
