

absl::Status::SetPayload

```
graph LR; A[absl::Status::SetPayload] --> B[absl::Status::ok]
```

A diagram showing a transition from a function to a status value. On the left, a gray rectangular box contains the text 'absl::Status::SetPayload'. A blue arrow points from the right side of this box to the right side of a white rectangular box on the right. The white box contains the text 'absl::Status::ok'.

absl::Status::ok
