Eigen::internal::psincos
_inner_msa_float

```
graph LR; A["Eigen::internal::pcos< Packet4f >"] --> C["Eigen::internal::psincos_inner_msa_float"]; B["Eigen::internal::psin< Packet4f >"] --> C;
```

The diagram illustrates a dependency or data flow. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'Eigen::internal::pcos' followed by '< Packet4f >' on the next line. The bottom box contains 'Eigen::internal::psin' followed by '< Packet4f >' on the next line. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the top-left corner of a gray rectangular box on the right. The arrow from the bottom box points to the top-left corner of the same gray box, slightly lower than the first arrow. The gray box contains the text 'Eigen::internal::psincos' followed by '_inner_msa_float' on the next line.
