

absl::random_internal
::BetaIncomplete

absl::random_internal
::BetaIncompleteInv

absl::random_internal
::beta

```
graph LR; A["absl::random_internal::BetaIncomplete"] --> C["absl::random_internal::beta"]; B["absl::random_internal::BetaIncompleteInv"] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'absl::random_internal::BetaIncomplete' and the bottom box contains 'absl::random_internal::BetaIncompleteInv'. On the right, there is a single gray rectangular box with a black border containing the text 'absl::random_internal::beta'. Two blue arrows originate from the right side of the top-left box and the right side of the bottom-left box, both pointing towards the left side of the gray box on the right.
