

generate_copts.CMakeStyle.docstring

generate_copts.StarlarkStyle.docstring

generate_copts.file_header_lines

```
graph LR; A[generate_copts.CMakeStyle.docstring] --> D[generate_copts.file_header_lines]; B[generate_copts.StarlarkStyle.docstring] --> D;
```

The diagram illustrates a data flow where two separate docstring inputs are combined into a single output. On the left, two white rectangular boxes with black borders contain the text 'generate_copts.CMakeStyle.docstring' and 'generate_copts.StarlarkStyle.docstring'. On the right, a gray rectangular box with a black border contains the text 'generate_copts.file_header_lines'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both docstrings are used to generate the file header lines.
