

absl::StatusMessageAsCStr

```
graph LR; A[absl::StatusMessageAsCStr] --> B[absl::string_view::empty]; A --> C[absl::Status::message];
```

The diagram illustrates a function call from `absl::StatusMessageAsCStr` to two other functions. A gray box on the left contains the text `absl::StatusMessageAsCStr`. Two blue arrows originate from the right side of this box. The top arrow points to a white box containing `absl::string_view::empty`. The bottom arrow points to a white box containing `absl::Status::message`.

absl::string_view::
empty

absl::Status::message
