

absl::crc\_internal  
::CrcMemcpyEngine

```
graph BT; A["absl::crc_internal::CrcNonTemporalMemcpyEngine"] --> B["absl::crc_internal::CrcMemcpyEngine"]
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray box representing the base class, `absl::crc_internal::CrcNonTemporalMemcpyEngine`. At the top is a white box representing the derived class, `absl::crc_internal::CrcMemcpyEngine`. Two blue arrows point upwards from the base class box to the derived class box, indicating that `CrcMemcpyEngine` inherits from `CrcNonTemporalMemcpyEngine`.
