

testing::Test

```
graph BT; A["absl::synchronization_internal::GraphCyclesTest"] --> B["testing::Test"]
```

The diagram illustrates an inheritance relationship. At the bottom, a gray rectangular box contains the text 'absl::synchronization_internal::GraphCyclesTest'. Two blue arrows originate from the top of this box and point upwards to a white rectangular box at the top, which contains the text 'testing::Test'. This visualizes that 'absl::synchronization_internal::GraphCyclesTest' inherits from 'testing::Test'.

absl::synchronization
_internal::GraphCyclesTest
