

```
absl::container_internal  
::common_policy_traits  
  < SlotPolicy >
```

The diagram shows a white box at the top containing the code for `absl::container_internal::common_policy_traits`. Below it is a gray box containing the code for `absl::container_internal::common_params`. Two blue arrows point upwards from the gray box to the white box, indicating that `common_params` inherits from or specializes `common_policy_traits`.

```
absl::container_internal  
::common_params< Key, Compare,  
  Alloc, TargetNodeSize, IsMulti,  
  IsMap, SlotPolicy >
```
