

absl::cord_internal
::CordRep

```
graph BT; A["absl::cord_internal::CordRepSubstring"] --> B["absl::cord_internal::CordRep"]
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray rectangular box containing the text 'absl::cord_internal' followed by '::CordRepSubstring' on the next line. At the top is a white rectangular box with a black border containing the text 'absl::cord_internal' followed by '::CordRep' on the next line. Two blue arrows originate from the top edge of the gray box and point upwards to the bottom edge of the white box, indicating that 'CordRepSubstring' inherits from 'CordRep'.

absl::cord_internal
