

```
absl::compare_internal  
::partial_ordering_base  
< partial_ordering >
```

The diagram illustrates a relationship between two C++ classes. At the bottom is a gray rectangular box containing the text `absl::partial_ordering`. Above it is a white rectangular box with a black border containing the text `absl::compare_internal::partial_ordering_base` followed by `< partial_ordering >` on the next line. Two blue arrows originate from the top edge of the gray box and point upwards to the bottom edge of the white box, indicating that `absl::partial_ordering` inherits from or specializes `absl::compare_internal::partial_ordering_base`.

```
absl::partial_ordering
```
