

absl::container\_internal  
::base\_checker::erase

absl::container\_internal  
::base\_checker::erase

absl::container\_internal  
::base\_checker::erase\_check

```
graph LR; A["absl::container_internal::base_checker::erase"] --> C["absl::container_internal::base_checker::erase_check"]; B["absl::container_internal::base_checker::erase"] --> C;
```

The diagram consists of three rectangular boxes. On the left, there are two white boxes with black borders, each containing the text 'absl::container\_internal' on the top line and '::base\_checker::erase' on the bottom line. On the right, there is a single gray box with a black border containing the text 'absl::container\_internal' on the top line and '::base\_checker::erase\_check' on the bottom line. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating a mapping or relationship between the two 'erase' functions and the 'erase\_check' function.
