

absl::cord\_internal  
::InlineData::InlineData

absl::cord\_internal  
::InlineData::InlineData

absl::cord\_internal  
::InlineData::poison\_this

```
graph LR; A[absl::cord_internal::InlineData::InlineData] --> C[absl::cord_internal::InlineData::poison_this]; B[absl::cord_internal::InlineData::InlineData] --> C;
```

The diagram consists of three rectangular boxes. On the left, there are two white boxes with black borders, each containing the text 'absl::cord\_internal' on the first line and '::InlineData::InlineData' on the second line. On the right, there is a single gray box with a black border containing the text 'absl::cord\_internal' on the first line and '::InlineData::poison\_this' on the second line. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating a mapping or relationship between the two 'InlineData' types and the 'poison\_this' variable.
