

std::true\_type

The diagram illustrates the inheritance of the `std::true_type` trait from the `absl::flat_hash_set` template parameters. Two blue arrows point upwards from the `absl::flat_hash_set` template arguments to the `std::true_type` box, indicating that the trait is inherited from these arguments.

```
absl::container_algorithm  
_internal::IsUnorderedContainer  
< absl::flat_hash_set< Key,  
  Hash, KeyEqual, Allocator > >
```
