

absl::flags_internal
::FlagStateInterface

```
graph BT; A["absl::flags_internal::FlagState"] --> B["absl::flags_internal::FlagStateInterface"]; A --> B;
```

The diagram consists of two rectangular boxes. The top box is white with a black border and contains the text 'absl::flags_internal' followed by '::FlagStateInterface' on the next line. The bottom box is gray with a black border and contains the text 'absl::flags_internal' followed by '::FlagState' on the next line. Two blue arrows originate from the top edge of the gray box and point upwards to the bottom edge of the white box, indicating that the gray box inherits from the white box.
