

absl::log\_internal  
::LogMessage

```
graph BT; A["absl::log_internal::LogMessageFatal"] --> B["absl::log_internal::LogMessage"]
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray rectangular box containing the text 'absl::log\_internal::LogMessageFatal'. At the top is a white rectangular box with a black border containing the text 'absl::log\_internal::LogMessage'. Two blue arrows originate from the top edge of the gray box and point upwards to the bottom edge of the white box, indicating that 'absl::log\_internal::LogMessageFatal' inherits from 'absl::log\_internal::LogMessage'.

absl::log\_internal  
::LogMessageFatal
