

Eigen::internal::pmax

Eigen::internal::pmin

Eigen::internal::pminmax
_impl::run

```
graph LR; A[Eigen::internal::pmax] --> C[Eigen::internal::pminmax_impl::run]; B[Eigen::internal::pmin] --> C;
```

The diagram illustrates a function call or data flow. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'Eigen::internal::pmax' and the bottom box contains 'Eigen::internal::pmin'. Two blue arrows originate from the right side of these boxes and point towards a single gray rectangular box on the right. This gray box contains the text 'Eigen::internal::pminmax_impl::run' on two lines. The arrows indicate that both 'pmax' and 'pmin' are inputs to the 'pminmax_impl::run' function.
