

testing::TestWithParam
< bool >

CordTest

```
graph BT; CordTest --> TestWithParam[testing::TestWithParam< bool >];
```

The diagram illustrates a C++ inheritance relationship. At the bottom is a gray box labeled 'CordTest'. Two blue arrows point upwards from this box to a white box at the top labeled 'testing::TestWithParam< bool >'. This indicates that 'CordTest' inherits from 'testing::TestWithParam< bool >'.
