

Eigen::AngleAxis::Identity

Eigen::AngleAxis::inverse

Eigen::AngleAxis::AngleAxis

```
graph LR; A[Eigen::AngleAxis::Identity] --> C[Eigen::AngleAxis::AngleAxis]; B[Eigen::AngleAxis::inverse] --> C;
```

The diagram illustrates the relationship between two functions and a class. On the left, two white rectangular boxes with black borders contain the text 'Eigen::AngleAxis::Identity' and 'Eigen::AngleAxis::inverse'. On the right, a gray rectangular box with a black border contains the text 'Eigen::AngleAxis::AngleAxis'. Two blue arrows point from the right side of the left boxes to the left side of the gray box, indicating that both functions are associated with or point to the 'AngleAxis' class.
