

main

```
graph LR; main[main] --> absl[absl::InitializeSymbolizer]
```

A diagram illustrating a function call. On the left, a gray rectangular box contains the text 'main'. A blue arrow points from the right side of this box to the left side of a larger white rectangular box on the right. This white box contains the text 'absl::InitializeSymbolizer'. Both boxes have a thin black border.

absl::InitializeSymbolizer
