

absl::internal\_any  
\_invocable::CoreImpl  
::InitializeRemoteManager

```
graph LR; A["absl::internal_any  
_invocable::CoreImpl  
::InitializeRemoteManager"] --> B["absl::internal_any  
_invocable::RemoteManagerNontrivial"]
```

A diagram showing a call from a CoreImpl object to a RemoteManagerNontrivial object. The left box is shaded gray and contains the text 'absl::internal\_any \_invocable::CoreImpl ::InitializeRemoteManager'. A blue arrow points from the right side of this box to the left side of the right box. The right box is white with a black border and contains the text 'absl::internal\_any \_invocable::RemoteManagerNontrivial'.
