

absl::inlined_vector
_internal::Storage::MakeStorageView

absl::inlined_vector
_internal::Storage::SubtractSize

absl::inlined_vector
_internal::Storage::GetSize

```
graph LR; A["absl::inlined_vector<br>_internal::Storage::MakeStorageView"] --> C["absl::inlined_vector<br>_internal::Storage::GetSize"]; B["absl::inlined_vector<br>_internal::Storage::SubtractSize"] --> C;
```

The diagram illustrates a dependency or relationship between three functions. On the left, two white rectangular boxes with black borders contain the function names: 'absl::inlined_vector _internal::Storage::MakeStorageView' (top) and 'absl::inlined_vector _internal::Storage::SubtractSize' (bottom). On the right, a gray rectangular box with a black border contains the function name 'absl::inlined_vector _internal::Storage::GetSize'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'MakeStorageView' and 'SubtractSize' depend on or interact with 'GetSize'.
