

```
internal::generic_xpr  
_base::type
```

The diagram illustrates a C++ inheritance relationship. At the bottom, a gray rectangular box contains the text 'Eigen::InversesImpl < XprType, StorageKind >'. Two blue arrows originate from the top of this box and point upwards to the bottom edge of a white rectangular box above it. The white box contains the text 'internal::generic\_xpr\_base::type'. This visualizes that 'Eigen::InversesImpl' inherits from 'internal::generic\_xpr\_base'.

```
Eigen::InversesImpl  
< XprType, StorageKind >
```
